

Watkiss BookMaster Pro30

Robust 30-sheet booklet maker featuring a high quality stapling system and an easy-to-use computerised set-up, making it ideal for digital and offset applications.

Performance and Efficiency

The BookMaster Pro30 booklet maker and trimmer combine maximum performance with cost effectiveness. They are simple to operate and low maintenance, making them by far the most user friendly and reliable staple-fold booklet makers available today. They can be used off-line for hand feeding, or on-line to Watkiss sheet feeders and collators, as well as other manufacturers' bench-top collators and creasers.

Stapling Quality

The BookMaster has a unique low-impact stapling mechanism that ensures virtually maintenance free operation. The main wearing parts are included in the staple cartridge and are replaced every 5,000 cycles when the cartridge is changed. As a result, over one million cycles can be run before staple head maintenance is required.

Easy to Use

The BookMaster Pro30 has automatic set-up to adjust the sidelays, endjog and staple/fold position. When used on-line with a Watkiss collator, the collator's colour touch-screen runs the entire system. For offline use, a separate control panel is available. The settings for standard sheet sizes are ready programmed and other custom sizes can be saved to memory for later use.

Finishing Touches

The optional TrimMaster Pro30 trimmer has a single self-sharpening hardened steel blade to neatly trim the fore-edge of the book. All trimmings are transported outside the machine to an external waste box allowing continuous operation.

For full-bleed work, an optional two-knife trimmer trims the top and bottom edge of the booklet.

Added Value

For added value, include the SpineMaster in your booklet maker solution to produce SquareBack™ books that are flat and easy to pack, stack and handle. There is no risk of loose pages - you can even print on the spine.

Key Features

- Professional standard build quality, for long and reliable lifetime performance
- Maintenance-free staple system produces high quality stapled booklets from 2 to 30 sheets
- External trimmer waste-bin
- Small floorspace requirements
- Centre referenced for balanced and reliable paper feeding; including heavy art papers
- Automatic size adjustment via colour touch-screen
- Modular system that can be configured to match your requirements
- Optional motorised infeed makes hand-feeding fast and easy
- Optional two-knife trimmer trims the top and bottom edge of the booklet
- Optional SpineMaster for SquareBack books
- Connect online to Watkiss sheet feeders and collators for automated productivity
